DAFcheck

A full service and inspection history you can trust

Service records at your fingertips

With VOSA's Operators Compliance Risk Score (OCRS) system becoming increasingly important and affecting 'O' Licences, the recording and retrieval of vehicle maintenance records are becoming even more critical for truck operators. DAF has developed its own web-based system, called DAFcheck, for recording the inspection and service history of trucks and has now made it available free of charge to operators.

In a nutshell, DAFcheck is an electronic maintenance records system. It provides you, the operator, with a dedicated website: www.dafcheck.eu which can be accessed via an email and password login to view the inspection and servicing details of all the vehicles in your fleet. It is constantly updated, helping to control compliance with VOSA requirements simply and accurately. It reduces administration and enables data to be saved, printed or distributed instantaneously.

It's as simple as that. And it's free.

'DAF has revolutionised the way that our vehicle inspections and servicing are carried out, communicated to us and recorded. With DAFcheck I can now see the status and recent history of our vehicles on a web screen. It's very user friendly and a great management tool. And it doesn't cost me anything.'

Roz Reeves, Smurfit Kappa Sheetfeeding, Norwich.

The benefits of DAFcheck to you

DAFcheck offers multiple benefits:

- DAFcheck complies with the VOSA 'Guide to Maintaining Roadworthiness'
- All information is legible, complete and consistent
- Authorisation is recorded
- Information is on time and doesn't get mislaid
- Inspection and servicing details are viewable on a website immediately following sign off at the dealer
- Both DAF vehicles and other makes can be included for complete fleet analysis
- Vehicle and job details can be printed, saved and emailed
- By recording the full service history, DAFcheck helps to reinforce residual values
- DAFcheck is an in-house DAF system that has been introduced precisely to meet operator requirements

And DAFcheck is free. All the benefits of this revolutionary improvement in the services that DAF and its dealers provide come at no charge whatsoever:

'It's a success from everybody's viewpoint and most of all, the customer's. It's a huge leap forward compared with the old paper system – customers were continually asking for a faster supply of inspection information and now it's available instantly.'

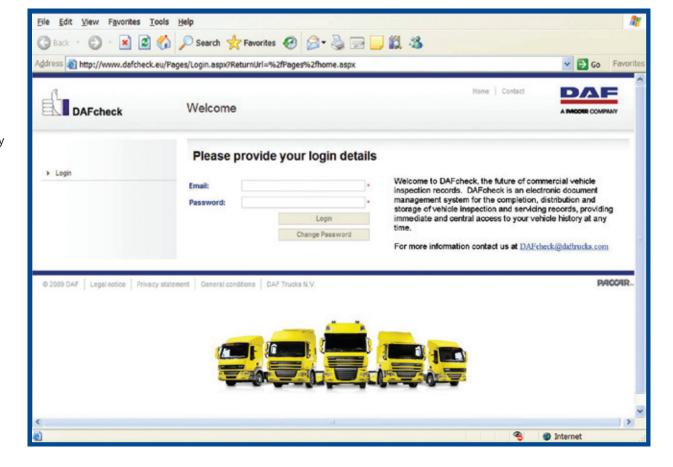

How DAFcheck works

DAFcheck starts with the carrying out of a vehicle inspection by a DAF technician to VOSA guidelines and standards. The results, including any customer reported defects, are recorded on a touch screen and the technician 'signs' the inspection declaring serviceability or otherwise. Defects noted during the inspection, plus any servicing, are carried out and recorded, then signed electronically. The workshop foreman / manager approves the work and signs a declaration of roadworthiness. The DAFcheck website is updated and can be viewed immediately. If you wish, an email can be sent to you advising you that the inspection and associated work has been completed with a copy of the inspection sheet.

Easy and Immediate Access

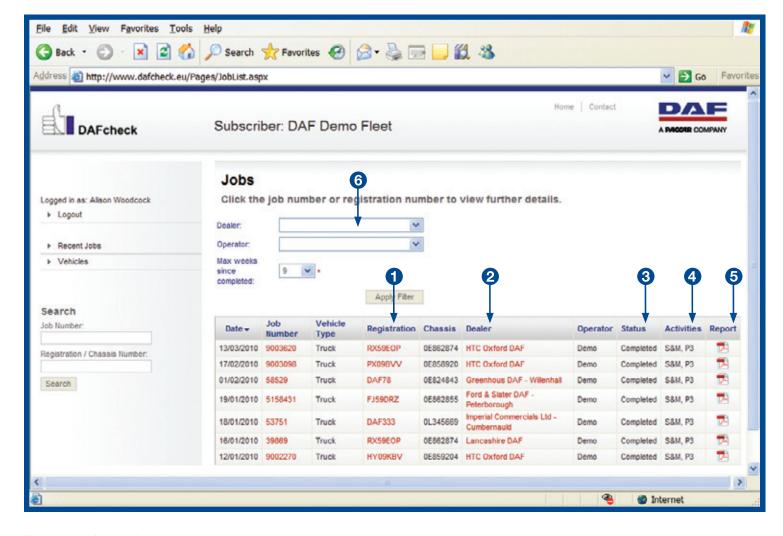

Go to the DAFcheck website www.dafcheck.eu and enter your email address and password. Click on login. If you do not have a subscriber (customer) account, and you are the owner or operator, it can be set up simply by contacting the Service Manager or Department at your DAF Dealer or email DAFcheck@daftrucks.com.

Features

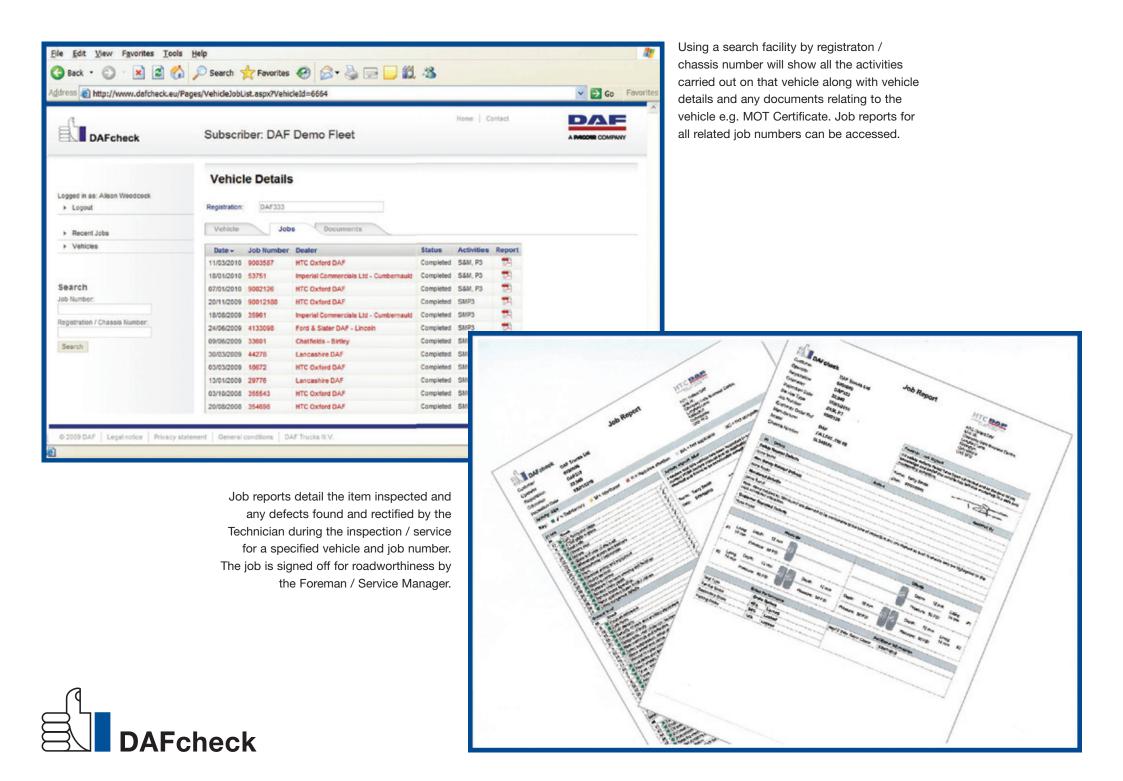

Once the login details have been accepted, this web page with the subscriber name will appear. 'Max weeks since completion' will show as '1'. This can be extended to a maximum of 14 weeks and will then list all completed jobs in the selected period.

Features of this 'Jobs' page include:

- 1 Clicking on the vehicle registration will display vehicle details and the job history
- 2 Clicking on the dealer assigned to the specific job provides all contact details for that dealer
- 3 Indicates status of inspection
- 4 Indicates what activity is recorded: S&M Safety Inspection; P3,I,X,Y Services
- 5 Clicking on the PDF icon will open a window enabling viewing, printing, saving and emailing of the selected inspection/service sheet
- 6 By selecting a specific dealer you can view all activities completed by that dealer up to a maximum of 14 weeks.

'The DAF Check system has enhanced our maintenance programme.

With service reports received by email on job completion together

with on-line access for both local site management and Head Office Fleet

Manager, we are able to operate at a high legislative standard. The inclusion

of electronically storing vehicle documents completes the package.'

Andrew Sykes, Group Transport Manager, ASD Metal Services, Leeds.
